TABLE OF CONTENTS

	Page
EXPLANATORY NOTES	2
KEY TO ABBREVIATIONS OF COUNTRIES	3
SUMMARY TABLES:	
Exports of Canadian Produce, by Countries	4
Exports of Foreign Produce, by Countries.....	6
Exports of Canadian Produce, by Main Groups	7
DETAILED TABLES:	
Exports of Canadian Produce, by Commodities and Countries:	
Agricultural and Vegetable Products (except Chemicals, Fibres and Wood):	Class Number
A — Mainly Food	10 to 800
B — Other than Food.....	1010 to 1730
Animals and Animal Products (except Chemicals and Fibres)	2010 to 2860
Fibres, Textiles and Textile Products.....	3010 to 3460
Wood, Wood Products and Paper	4010 to 4990
Iron and Its Products.....	5005 to 5970
Non-Ferrous Metals and Their Products (except Gold)	6010 to 6680
Non-Metallic Minerals and Their Products (except Chemicals)	7010 to 7690
Chemicals and Allied Products	8020 to 8490
Miscellaneous Commodities	9020 to 9575
Special Transactions — Non-Trade.....	9905 to 9992
Exports of Foreign Produce, by Commodities	10 to 9992

VALUE, PRICE AND VOLUME INDEXES at end of report.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electrical energy where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.
4. **Coverage.** Statistics of "Exports of Canadian Produce" (also known as "Domestic Exports") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Exports of Foreign Produce" (also known as "Re-Exports") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunker supplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January, 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electrical energy reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in Volume II of the annual report "Trade of Canada". The letters "N.O.P." mean "not otherwise provided for", "N.E.S.", "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

KEY TO ABBREVIATIONS OF COUNTRIES

Note: The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in Volume I of the Annual Report of the Trade of Canada.

Value, Price and Volume Indexes of Exports of Canadian Produce

The following table gives index numbers of the declared (statistical) value of exports of Canadian produce by months, and of the unit value (price) and volume of these exports. The value index expresses the value of exports in a given month as a percentage of the monthly average in the base year. The price index is of the fixed-weight aggregative (Laspeyres) type, and combines unit values calculated from the monthly export statistics with specified wholesale or other price quotations. These latter quotations are used where inadequate quantity reporting or insufficiently homogeneous items in the trade statistics prevent the obtaining of sufficiently representative unit value series. The volume index is derived by dividing the value index by the corresponding price index, and is, therefore, of the currently-weighted (Paasche) type. These indexes are computed with 1948 as an interim reference base pending conversion to the Bureau's official post-war reference base (1949).

In computing the price index certain adjustments were made to the regular grouping of commodities used in the trade statistics, and all three indexes are presented on the basis of these adjusted groups. The adjustments are as follows: the two groups "agricultural and vegetable products" and "animals and animal products" have been combined into one group now titled "agricultural and animal products"; the sub-group "rubber and its products" (1190-1340) has been transferred to the "miscellaneous products" group; the item "ships" (9400) has been transferred to the "iron and steel and their products" group. Beginning with statistics for January, 1960, the trade totals used for the purpose of all three indexes are also adjusted for "Special Transactions - Non-Trade" as described in the blue pages of the January, 1960, issue of this report.

These indexes are currently computed from the original data for months, quarters and calendar years. Approximate indexes for other periods may be obtained by averaging the monthly values. Although such indexes will be less accurate than would result from a separate computation based on the original data, the margin of error is insufficient to necessitate a lengthy separate computation.

A complete record of these series by months for the post-war period is published in issues of Volume I of the annual report "Trade of Canada". Some additional commodity information appears in issues of the "Review of Foreign Trade". Details of the computation of the price indexes are given in D.B.S. Reference Paper, No. 8, 1950, titled "Export and Import Price Indexes by Months, July, 1945 - June, 1950 (1948 = 100)".

EXPLANATORY NOTES	2
KEY TO ABBREVIATIONS OF COUNTRIES	3
SUMMARY TABLES:	
Exports of Canadian Produce, by Countries	4
Exports of Foreign Produce, by Countries.....	6
Exports of Canadian Produce, by Main Groups	7
DETAILED TABLES:	
Exports of Canadian Produce, by Commodities and Countries:	
Agricultural and Vegetable Products (except Chemicals, Fibres and Wood):	Class Number
A — Mainly Food	10 to 800
B — Other than Food	1010 to 1730
Animals and Animal Products (except Chemicals and Fibres)	2010 to 2860
Fibres, Textiles and Textile Products.....	3010 to 3460
Wood, Wood Products and Paper	4010 to 4990
Iron and Its Products.....	5005 to 5970
Non-Ferrous Metals and Their Products (except Gold)	6010 to 6680
Non-Metallic Minerals and Their Products (except Chemicals)	7010 to 7690
Chemicals and Allied Products	8020 to 8490
Miscellaneous Commodities	9020 to 9575
Special Transactions — Non-Trade.....	9905 to 9992
Exports of Foreign Produce, by Commodities	10 to 9992

VALUE, PRICE AND VOLUME INDEXES at end of report.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electrical energy where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of "Exports of Canadian Produce" (also known as "Domestic Exports") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Exports of Foreign Produce" (also known as "Re-Exports") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunker supplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January, 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electrical energy reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in Volume II of the annual report "Trade of Canada". The letters "N.O.P." mean "not otherwise provided for", "N.E.S.", "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

Value, Price and Volume Indexes of Exports of Canadian Produce

The following table gives index numbers of the declared (statistical) value of exports of Canadian produce by months, and of the unit value (price) and volume of these exports. The value index expresses the value of exports in a given month as a percentage of the monthly average in the base year. The price index is of the fixed-weight aggregative (Laspeyres) type, and combines unit values calculated from the monthly export statistics with specified wholesale or other price quotations. These latter quotations are used where inadequate quantity reporting or insufficiently homogeneous items in the trade statistics prevent the obtaining of sufficiently representative unit value series. The volume index is derived by dividing the value index by the corresponding price index, and is, therefore, of the currently-weighted (Paasche) type. These indexes are computed with 1948 as an interim reference base pending conversion to the Bureau's official post-war reference base (1949).

In computing the price index certain adjustments were made to the regular grouping of commodities used in the trade statistics, and all three indexes are presented on the basis of these adjusted groups. The adjustments are as follows: the two groups "agricultural and vegetable products" and "animals and animal products" have been combined into one group now titled "agricultural and animal products"; the sub-group "rubber and its products" (1190-1340) has been transferred to the "miscellaneous products" group; the item "ships" (9400) has been transferred to the "iron and steel and their products" group. Beginning with statistics for January, 1960, the trade totals used for the purpose of all three indexes are also adjusted for "Special Transactions - Non-Trade" as described in the blue pages of the January, 1960, issue of this report.

These indexes are currently computed from the original data for months, quarters and calendar years. Approximate indexes for other periods may be obtained by averaging the monthly values. Although such indexes will be less accurate than would result from a separate computation based on the original data, the margin of error is insufficient to necessitate a lengthy separate computation.

A complete record of these series by months for the post-war period is published in issues of Volume I of the annual report "Trade of Canada". Some additional commodity information appears in issues of the "Review of Foreign Trade". Details of the computation of the price indexes are given in D.B.S. Reference Paper, No. 8, 1950, titled "Export and Import Price Indexes by Months, July, 1945 - June, 1950 (1948 = 100)".

NEW EXPORT COMMODITY CLASSIFICATION EFFECTIVE JANUARY 1, 1961

Beginning with statistics for January, 1961, a new commodity classification will be used in the monthly report Trade of Canada - Exports (Catalogue No. 65-004). Export statistics for January 1961 will be delayed by some six to eight weeks because of this change. This delay will gradually be overcome in subsequent 1961 reports, and it is expected that a normal production schedule will be restored by year-end.

All subscribers to Trade of Canada - Exports will receive a copy of the new Export Commodity Classification a few days after receipt of their December 1960 report. This will permit subscribers to examine the new classification before the receipt of the first report on the new basis and to locate in this report the statistics in which they are interested.

The new Export Commodity Classification is based on the Standard Commodity Classification (Catalogue No. 12-502) which was developed in the Dominion Bureau of Statistics as a tool for integrating statistical series derived from different sources. Whereas the classification previously in use classified commodities primarily according to the material of which they were chiefly composed, the new classification will group commodities primarily according to stage of processing and purpose. The main groups of the old classification are familiar to users of these reports; those of the new Export Commodity Classification are as follows:

Section	Title	Class Numbers	Number of Classes
I	Live Animals	1-19 to 9-99	16
II	Food, Feed, Beverages and Tobacco .	11-09 to 183-99	284
III	Crude Materials, Inedible	201-10 to 291-99	161
IV	Fabricated Materials, Inedible	300-12 to 490-99	292
V	End Products, Inedible	500-19 to 960-99	264
VI	Special Transactions - Trade	970-10 to 970-75	3
VII	Special Transactions - Non-Trade ..	990-05 to 995-89	12
			<hr/> 1,032

Sections I to V of the Export Commodity Classification are defined exactly as in the Standard Commodity Classification, and almost all the divisions and many groups and items of the Standard Commodity Classification are duplicated in the Export Commodity Classification.

Section VI is reserved for special transactions of a type not usually encountered in other statistical work but which are properly included in totals of Canadian trade. The components of this Section are export packing, contractors' outfits, and small value shipments.

Section VII is reserved for special transactions of a type not properly included in totals of Canadian trade but for which records must be kept and published. This Section is identical with Group X of the former classification, and was described in some detail in the blue page insert of the January 1960 issue of this report.

As part of the change to a new classification the commodity detail shown in export statistics will be modernized by eliminating statistics on many commodities now of minor significance and instituting new classes for many commodities of greater importance. The grouping system employed in the new classification will also make easier the identification of other commodities which may merit separate specification. For most of the commodities of greatest importance in Canadian exports the classes of the new Export Commodity Classification are substantially identical with those of its predecessor.

Although a new commodity classification will be used, the format of the 1961 issues of this report will be basically unchanged. Statistics of domestic exports will still be presented on a commodity-by-country basis with both single month and cumulative totals, and there will still be summary tables for domestic exports by countries and re-exports by geographic region and commodity. For the convenience of those accustomed to using the main group totals of the old classification, there will also be a summary table containing the former main group totals.

Other export reports prepared by the External Trade Section will be affected in varying degree by the introduction of the Export Commodity Classification. The quarterly report Commodities Exported to Each Country (Catalogue No. 65-003) and the annual report Trade of Canada, Vol.II, Exports (Catalogue No. 65-202) will present commodity detail on the basis of the new classification. However, the monthly bulletin Domestic Exports (Catalogue No. 65-002) and the annual report Trade of Canada, Vol.I, Summary and Analytical Tables (Catalogue No. 65-201) will for the present continue to present summaries of Canadian trade statistics according to the old commodity classification in order to facilitate comparisons with previous years.

It is expected that a similar new commodity classification will be introduced for import statistics in about a year.

VALUE, PRICE AND VOLUME INDEXES at end of report.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electrical energy where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of "Exports of Canadian Produce" (also known as "Domestic Exports") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Exports of Foreign Produce" (also known as "Re-Exports") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunker supplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January, 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electrical energy reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in Volume II of the annual report "Trade of Canada". The letters "N.O.P." mean "not otherwise provided for", "N.E.S.", "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

KEY TO ABBREVIATIONS OF COUNTRIES

Note: The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in Volume I of the Annual Report of the Trade of Canada.

Value, Price and Volume Indexes of Exports of Canadian Produce

The following table gives index numbers of the declared (statistical) value of exports of Canadian produce by months, and of the unit value (price) and volume of these exports. The value index expresses the value of exports in a given month as a percentage of the monthly average in the base year. The price index is of the fixed-weight aggregative (Laspeyres) type, and combines unit values calculated from the monthly export statistics with specified wholesale or other price quotations. These latter quotations are used where inadequate quantity reporting or insufficiently homogeneous items in the trade statistics prevent the obtaining of sufficiently representative unit value series. The volume index is derived by dividing the value index by the corresponding price index, and is, therefore, of the currently-weighted (Paasche) type. These indexes are computed with 1948 as an interim reference base pending conversion to the Bureau's official post-war reference base (1949).

In computing the price index certain adjustments were made to the regular grouping of commodities used in the trade statistics, and all three indexes are presented on the basis of these adjusted groups. The adjustments are as follows: the two groups "agricultural and vegetable products" and "animals and animal products" have been combined into one group now titled "agricultural and animal products"; the sub-group "rubber and its products" (1190-1340) has been transferred to the "miscellaneous products" group; the item "ships" (9400) has been transferred to the "iron and steel and their products" group. Beginning with statistics for January, 1960, the trade totals used for the purpose of all three indexes are also adjusted for "Special Transactions - Non-Trade" as described in the blue pages of the January, 1960, issue of this report.

These indexes are currently computed from the original data for months, quarters and calendar years. Approximate indexes for other periods may be obtained by averaging the monthly values. Although such indexes will be less accurate than would result from a separate computation based on the original data, the margin of error is insufficient to necessitate a lengthy separate computation.

A complete record of these series by months for the post-war period is published in issues of Volume I of the annual report "Trade of Canada". Some additional commodity information appears in issues of the "Review of Foreign Trade". Details of the computation of the price indexes are given in D.B.S. Reference Paper, No. 8, 1950, titled "Export and Import Price Indexes by Months, July, 1945 - June, 1950 (1948 = 100)".
